

FILLER PANEL WITH INTEGRATED HANDLE

5

ABSTRACT OF THE DISCLOSURE

A keyed filler panel assembly for removable coupling of a filler panel body with respect to a chassis is disclosed. In one embodiment, the present invention is comprised of a filler panel body. The present embodiment is further comprised of a handle element integral with the filler panel body.

10

The handle element is fixedly coupled with the filler panel body, and adapted to provide a grasping surface above the filler panel body such that removably coupling the filler panel body with respect to a chassis is simplified.
